## Essential info

|                  |   |
|------------------|---|
| Place / country: | Tettngang, Germany  |
| Year:            | 2013  |
| Building type:   | Office building   |
| Solutions:       | Rooflight F100<br>CI System Smoke Lift F100<br>LAMILUX Reflective |

The 30 pieces of Rooflights F100 and the 10 pieces of CI System Smoke Lifts F100 ensure a higher amount of daylight incidence and thus a friendly working atmosphere in the factory and office building of the world-famous sporting goods manufacturer.

The daylight elements are additionally equipped with LAMILUX Reflective, which is a high-reflective coating on the inner side of the upstand.

This unique light directing element consist of high-reflective aluminum reflector material and provides a dazzle-free illumination, which increase the light transmission of rooflights up to 50%, thus increases daylight usage up to 25 % and enables an additional saving of artificial light up to 33%
